RESTRICTED USE PESTICIDE

Only for sale to and application by certified applicators of Fisheries and Oceans Canada, the U.S. Fish and Wildlife Service, or persons under their direct supervision in programs approved by the Great Lakes Fishery Commission.

**SEA LAMPREY LARVICIDE
LAMPRECID®**

GUARANTEE: 4-nitro-3-trifluoromethylphenol present as sodium salt at 34.0%

**RESTRICTED
DANGER**

POISON

READ THE LABEL BEFORE USING

REGISTRATION NO.: 11763 PEST CONTROL PRODUCTS ACT

NET CONTENTS: 22.72 L

FIRST AID:

IF SWALLOWED: Call a poison control centre or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give anything by mouth to an unconscious person.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control centre or doctor for treatment advice.

IF INHALED : Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control centre or doctor for further treatment advice

IF IN EYES : Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice.

Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION

No known effective antidote: Treat symptomatically.

Medical Personnel should contact CHEMTREC at 1-800-424-9300

International : 1-703-527-3887

PRECAUTIONS

KEEP OUT OF REACH OF CHILDREN

For use by trained operators only.

May be fatal if swallowed or absorbed through the skin.

Avoid contact with skin and eyes.

May produce severe burns.

Care must be exercised in handling the concentrated forms of Lamprecid.

Wear a long sleeved shirt, long pants, rubber boots with socks, chemical resistant gloves, a chemical resistant apron or chemical resistant coveralls and a face shield during mixing, loading, application, clean up, repair and other handling activities.

Users should wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet.

Users should remove clothing/personal protective equipment immediately if pesticide comes into contact with skin through soaked clothing or spills.

Then wash skin thoroughly and put on clean clothing.

Wash contaminated clothing before reuse.

Users should remove personal protective equipment immediately after handling this product.

Wash the outside of gloves before removing.

As soon as possible, wash thoroughly and change into clean clothing.

Do not apply this product in a way that will contact workers or other persons, either directly or through drift.

ENVIRONMENTAL HAZARDS

This product is to be used only in manner authorized. This chemical is toxic to fish and aquatic invertebrates. Non-target aquatic organisms may be killed at rates recommended on this label.

The directions for use must be strictly followed to minimize hazards to non-target organisms.

Do not contaminate water when cleaning equipment or disposing of equipment washwater.

Local and appropriate provincial pesticide regulatory authorities must be consulted about use permits that may be required before product is applied. Municipalities that use streams requiring treatment as potable water sources must be notified of the impending treatment at least 24 hours prior to application. Agricultural irrigators that use streams requiring treatment as a source of irrigation water must be notified of the impending treatment at least 24 hours prior to application. Agricultural irrigators must turn off their irrigation systems during treatment and for a 24 hour period after treatment.

STORAGE :

Do not contaminate water, food or feed by storage or disposal. Containers of Lamprecid should be stored in an area where spills or leakage of the material can be contained. This product is to be stored and displayed apart from food or feed.

DISPOSAL : Open dumping is prohibited.

1. Do not reuse this container.
2. Make the empty container unsuitable for future use.
3. Dispose of the container in accordance with provincial requirements.
4. For information on disposal of unused, unwanted product, contact the manufacturer or the provincial regulatory agency. Contact the manufacturer and the provincial regulatory agency in case of a spill, and for clean up of spills.

RESTRICTED USE

NOTICE TO USER

This pest control product is to be used only in accordance with the directions on the label. It is an offence under the Pest Control Products Act to use this product in a way that is inconsistent with the directions on the label. The user assumes the risk to persons or property that arises from any such use of this product.

NATURE OF RESTRICTION

FOR USE BY LICENCED OPERATORS ONLY

This product is to be used only in the manner authorized; consult local pesticide regulatory authorities about use permits that may be required. Only for sale to and application by certified applicators of Fisheries and Oceans Canada, the U.S. Fish and Wildlife Service, or persons under their direct supervision in programs approved by the Great Lakes Fishery Commission. Municipalities that use streams requiring treatment as potable water sources must be notified of the impending treatment at least 24 hours prior to application. Agricultural irrigators that use streams requiring treatment as a source of irrigation water must be notified of the impending treatment at least 24 hours prior to application. Agricultural irrigators must turn off their irrigation system for a 24-hour period during and after treatment. Not to be used by unauthorized personnel.

RESTRICTED USE

DIRECTIONS FOR USE

Pre-treatment surveys are always made to determine abundance of sea lamprey larvae (*Petromyzon marinus*). All waters in the Great Lakes Basin and the Lake Champlain system selected for treatment must first be analyzed on site to determine both the minimum concentration of Lamprecid required to kill sea lamprey larvae and the maximum concentration that can be applied without causing undue mortality of non-target organisms. "Analysis" constitutes live animal bioassay, or the use of a multiple regression relating bioassay results to on-site determination of pH, total alkalinity and conductivity of the body of water. The concentration of Lamprecid needed to kill sea lamprey larvae may vary depending upon water chemistry and temperature. Measure volume of flow-rate and add the amount of Lamprecid necessary at rates based on the foregoing analysis. Dispense Lamprecid by application devices sufficiently accurate to maintain predetermined concentration. Concentration in the body of water must be monitored either by colorimetric analysis, gas chromatography, or high performance liquid chromatography. Do not apply this product by air.
