

NOTICE

SEA LAMPREY TREATMENT IN PROGRESS

A chemical lampricide, often indicated by a yellow tint in the stream water, will be present in this stream between the dates of _____ and _____.

Prior to the above dates a red color in the stream water may indicate the presence of Rhodamine dye during a time of passage study.

For more information on sea lamprey control projects please call 906-869-5335 (U.S.) or 1-800-553-9091 (Canada).
